

Paleo Drought Workshop: Using the Past to Improve Drought Preparedness Now
How Insights from the Paleoclimate Record Can Inform Southern California Drought Preparedness Planning

April 19, 2018
8:30 a.m. – 2:45 p.m.
DoubleTree San Pedro
2800 Via Cabrillo-Marina, San Pedro

- | | |
|-------------------------|--|
| 8:30-9:00 a.m. | Registration & Check-In – Coffee & Pastries |
| 9:00-9:15 a.m. | Welcome & Introduction Jennifer Bowles, Executive Director, Water Education Foundation |
| 9:15-10:00 a.m. | Where We Are Now: <i>Drought Vulnerability & Preparedness</i> Jeanine Jones, Interstate Resources Manager, California Department of Water Resources |
| 10:00-10:45 a.m. | Where We've Been: <i>Drought in the Southern California Paleo Record</i> Connie Woodhouse, Professor, School of Geography and Development, University of Arizona |
| 10:45-11:30 a.m. | Where We're Going: <i>The Future with Climate Change</i> Mike Anderson, California State Climatologist, California Department of Water Resources |
| 11:30-12:30 p.m. | Lunch |
| 12:30-1:15 p.m. | New Mandates: <i>Executive Order B-37-16, Strengthen Local Drought Resilience</i> Peter Brostrom, Land & Water Use Program Manager, California Department of Water Resources |
| 1:15-2:00 p.m. | New Efforts: <i>Colorado River Basin Drought Contingency Planning</i> Chris Harris, Executive Director, Colorado River Board of California |
| 2:00-2:45 p.m. | New Understanding: <i>Status of Improving Sub-seasonal to Seasonal Precipitation Forecasting</i> Mike DeFlorio, Researcher, NASA Jet Propulsion Laboratory |
| 2:45 | Adjourn |
